Summary

A curious Python developer and data analyst who enjoys digging into data to find what's actually going on beneath the surface. Driven by a genuine interest in understanding how systems work and using that understanding to build smarter, more useful tools. Experienced in taking projects from raw data all the way to working AI-powered applications.

Projects

Smart Expense Analyzer

- Built a smart personal finance dashboard built with Python and Streamlit. It cleans and analyzes transaction data, auto-categorizes expenses, detects recurring charges, flags unusual spending, forecasts trends, and generates actionable insights with exportable reports.

AI Product Research Agent

- Built an AI product research agent using Python that analyzes demand, competition, and profitability to identify and rank high-potential product opportunities with data-driven insights.

Resume Analyzer

- Built an AI-powered resume analyzer using Python and Streamlit that parses PDFs, matches resumes to job descriptions, identifies ATS gaps, and generates actionable optimization suggestions.

Education

Quaid-e-Awam University of Engineering, Science & Technology Nawabshah

2022-2026

Bachelor's in Information Technology

Technical Skills

- Python
- Data Analysis
- NumPy
- Pandas
- Matplotlib
- SQL
- NoSQL
- Data Visualization
- Git & GitHub
