SUMMARY

BS Information Technology graduate who turns raw data into clear insights. Skilled in Python, SQL, Pandas, Excel, and Power BI (Power Query, DAX, data modeling), with experience in data cleaning, ETL, EDA, statistical analysis, forecasting, KPI reporting, and dashboards. Built six projects covering financial analytics, profitability and pricing analysis, and AI-powered decision support. Able to turn analysis into clear, business-ready recommendations. Seeking entry-level Data Analyst and Business Analyst roles.

EXPERIENCE

Qwetrum Technologies

Jun 2026 – Jul 2026

Data Analysis Intern, Remote

- Analyzed a 9,994-row retail dataset using Python and Pandas, identifying top-selling products, month-over-month revenue trends, seasonal patterns, and profitability across categories, regions, and discount tiers.
- Cleaned a Census Income dataset using mode-based imputation, removed 24 duplicate rows, standardized data types, converted strings to categorical data, and exported the processed dataset to CSV.
- Built Matplotlib and Seaborn visualizations for product performance, revenue trends, and category sales, translating analysis into clear, business-ready insights.

PROJECTS

Smart Expense Analyzer

- Developed a personal finance analytics tool that categorizes transactions via regex heuristics, flags anomalous spending and hidden subscriptions using IQR-based outlier detection, forecasts next-month expenses with moving averages, and tracks budget utilization; generates reports in 3 formats (PDF, CSV, JSON) with optional LLM-driven financial summaries.

AI Pricing Intelligence Engine

- Built a pricing tool that simulates P&L and profitability across 50 price points, clusters competitor pricing, and runs sensitivity analysis; outputs 90-day revenue projections and go/no-go pricing recommendations.

AI News Intelligence Dashboard

- Built an automated ETL pipeline that ingests up to 200 articles per run from 25+ RSS sources, classifies content into 13 topic clusters using TF-IDF cosine similarity, scores sentiment with VADER, and maps geographic signals across 28 countries; delivered as an interactive Streamlit dashboard with optional LLM summarization.

AI-Powered Startup Idea Validator

- Generates a business concept analysis from a single idea input, including SWOT breakdown, MVP scope, competitor mapping, and multi-factor risk scoring; features interactive radar charts, SQLite-backed session history, and LLM-powered and rule-based analysis modes.

AI Product Research Agent

- Designed a product discovery pipeline that scores 200+ e-commerce candidates on weighted multi-factor criteria with confidence levels and risk indicators; generates launch plans with unit economics to support data-driven decisions.

AI-Powered Resume Analyzer

- Built a local-first resume analysis tool that parses PDFs and compares candidates against job descriptions via TF-IDF vectorization to surface ATS keyword gaps; outputs a scored match report (~85% accuracy on test cases) with section-level rewrite coaching; operates fully offline.

EDUCATION

Quaid-e-Awam University of Engineering, Science & Technology

Nov 2022 – Sept 2026

Bachelor of Science in Information Technology

CGPA: 3.21

TECHNICAL SKILLS

Programming & Databases: Python, SQL, MySQL, PostgreSQL, SQLite, MongoDB

Data Analysis: Pandas, NumPy, Exploratory Data Analysis (EDA), Data Cleaning, Data Wrangling, Data Transformation, Data Validation, ETL, Statistical Analysis, Descriptive Statistics, Trend Analysis, Forecasting, Outlier Detection, Anomaly Detection

Data Visualization & Business Intelligence: Power BI, Power Query, DAX, Data Modeling (Star Schema), Dashboard Development, KPI Reporting, Data Storytelling, Matplotlib, Seaborn

Business Analysis: Profitability Analysis, Sensitivity Analysis, Unit Economics, SWOT & Competitor Analysis, MVP Scoping

Machine Learning & AI: Scikit-learn, Regression, Classification, Feature Engineering, Model Evaluation, NLP, Sentiment Analysis

Tools & Platforms: Microsoft Excel, Git, GitHub, Jupyter Notebook, Google Colab, Anaconda, Streamlit, Docker
